

New: This liner contains only good qualities.

Many years of profound technical experience and commercial knowledge are the foundations of this new revolutionary pond liner 4EverFlex®. Sustainability and environmental friendliness are the guiding principles of this product and under these conditions user enjoyment is optimised for the owner and this creates the ideal natural environment for the pond inhabitant.

With conventional equipment such as hot air welding and hot bolt welding, the foil is easy to process into the shape and size of pond you wish to create. The highly flexible liner follows the contours of the desired shape of your pond and under your guidance the end result will be total personal satisfaction. The incredible durability of 4EverFlex® enables us to guarantee it for a massive time period of no less than 27 years which is the longest guarantee in the pond liner market to-day. Should for

example, you wish to insert a water connection into 4EverFlex® the liner can be cut and then glued together perfectly without any problems.

Fish connoisseurs know that fish have a very sensitive sense of smell and a smelly liner contributes to build up of cumulative stress so that your fish do not thrive. Hence 4EverFlex® does not dominate in any way, but creates an impermeable and safe environmentally friendly seal.

You do not want to begrudge your fish a pond which is a safe and pleasant haven, do you? The only answer to this is installing 4EverFlex®.

We supply 4EverFlex® on rolls or custom-welded to the shape you desire. Do not hesitate to ask us for more information.

LONG-TERM
POND PLEASURE FOR
EVERY GENERATION

FRIENDLY
TO FISH AND
AQUATIC PLANTS

Life expectancy > 30 years through the use of high quality raw materials • High elasticity/flexibility • High tear resistance • Recyclable and thus environmentally friendly • No "rubber air smell" • Fish and plant-friendly (no growth defects in fish and/or plants) • Processes without harsh chemical solvents • Contains no heavy metals like cadmium or lead • Easy to weld with traditional hot air or hot bolt equipment • Easy to glue together directly, without strip or tape adhesive, which creates a really strong bond

REVOLUTION
IN THE FIELD OF
POND LINERS
